FOR IMMEDIATE RELEASE

### GLOW TO HOST HOUSEHOLD HAZARDOUS WASTE AND ELECTRONICS COLLECTION PROGRAMS

(Batavia, NY) – The GLOW Region Solid Waste Management Committee is pleased to announce that it will hold a single Household Hazardous Waste Collection. Funding is provided by GLOW's County contributions and a grant from the NYS Dept. of Environmental Conservation. Residents from Genesee, Livingston and Wyoming Counties are eligible to participate. The household hazardous waste collection will be held the morning of Saturday, September 18, 2019 in Rock Glen, Wyoming County. Materials accepted include household cleaning products, pesticides/insecticides, oil base paint/stains, vehicle batteries and fluids (except motor oil), oil filters, pool chemicals, driveway sealer, fluorescent tubes and bulbs and various other items. Passenger/light truck tires will be accepted for \$5.00 each and truck tires for \$10.00. Items that **WILL NOT** be accepted include latex paint, used motor oil, empty containers, asbestos, household batteries, pharmaceuticals and needles and syringes. Appointments are required. A total of 480 spots are available. Electronics **WILL Not** be accepted. Instead a separate electronics collection will be held one (1) week later, on September 25 from 9:00 a.m. to 12:00 p.m., also by appointment and also in Rock Glen. A limit of four (4) CRT TVs and/or monitors will apply that day. Three hundred sixty (450) appointments are available for that collection. For the first time, as much as possible, GLOW will utilize an online appointment system. Genesee County's G.I.S. Technician Chris Scheiner has spent months setting up the system that is convenient and easy to use. Residents can access it by going to GLOW's website-[www.glowsolidwaste.org](http://www.glowsolidwaste.org). Residents without Internet access can call the GLOW office at 585/815-7906 or 800/836-1154 or 585/344-2580 extension 5463. "Collections such as this provide residents with an excellent opportunity to safely dispose of materials they no longer want or need and that have the potential to harm human and environmental health. The GLOW Committee hopes that residents will take full advantage of the opportunity to rid their homes of these hazards," said Peggy Grayson, GLOW's Recycling Administrator.
